Phone: +880 1732716307 (WhatsApp)

OBJECTIVE

I'm a Front-End Developer with a strong foundation in HTML, CSS, JavaScript, and React JS. Seeking to leverage my expertise in web development and design to contribute to innovative projects. Passionate about creating user-friendly, responsive websites and applications.

PROJECTS

1. **Jobify** *(Team Project)*   Client-repo   Server-repo   Preview
   Jobify, is a job portal that makes job searching and hiring easier. Job seekers can quickly find jobs that match their skills, and employers can easily manage applications and connect with the right people.
   Features: Advanced job search, resume builder, user profiles, ATS, Job alerts, In-app messaging, career roadmap generator, and multilingual support.
   Technologies used: React, Node Js, Express JS, MongoDB, Firebase, Tailwind CSS, JWT.

2. **Asset Nexus Tower**   Client-repo   Server-repo   Preview
   Developed this system for managing company employees and assets, streamlining operations and enhancing productivity. Integrated tools for efficient employee management and product tracking.
   Features: Advance sort, search and filter systems. Secure Payment by Stripe and Realtime data updates.
   Technologies used: React, Node Js, Express JS, MongoDB, Firebase, Tailwind CSS, JWT.

3. **House Help Hub**   Client-repo   Server-repo   Preview
   H.H.H is a repair service provider website. Created this platform for providing efficient house repair services with easy booking and real-time tracking. Focused on quality service and customer satisfaction.
   Features: Realtime up to date, Secure Payment system.
   Technologies used: React JS, firebase, tailwind CSS, daisy UI, NodeJS, Express JS, MongoDB.
